Man Yee You

Junior Frontend Web Developer

Profile

Self-taught Junior Frontend Developer specializing in React, Next.js, TypeScript, and Tailwind CSS. Focused on building responsive, accessible, and high-performance user interfaces with clean, reusable components, API integrations, and Git-based workflows. Comfortable with Node.js fundamentals.

Projects

JKLM Game Clone (Real-Time Multiplayer Web Game)

- Built a browser-based multiplayer word game inspired by JKLM.fun.
- Implemented real-time player interactions using WebSocket-based communication.
- Designed responsive UI with **React, Next.js, TailwindCSS, and TypeScript**.
- Managed game state, player turns, and synchronization across clients.
- Focused on low-latency updates and smooth multiplayer gameplay experience.

Quiz App – (React / Next.js, TypeScript, Zustand, TailwindCSS)

- Built a web-based quiz application using React / Next.js and TypeScript
- Used Zustand for global state management (quiz progress, selected answers, score)
- Stored quiz questions in JSON files with a consistent format
- Organized questions by difficulty levels (easy, medium, hard)
- Implemented multiple-choice questions, answer validation, and explanations
- Focused on clean UI, clear feedback, and smooth user experience
- Improved skills in front-end logic, state management, and component structure

Pokedex Web App(React, TypeScript, Tailwind CSS)

- Built a responsive Pokedex application that fetches and displays Pokémon data from a public API
- Implemented dynamic routing and reusable UI components for Pokémon detail pages
- Managed asynchronous data fetching and loading states using modern React patterns
- Focused on clean component structure, type safety, and maintainable code
